

Customizing your Google Scholar Settings University of Saskatchewan Library

Enabling FindIt!/SFX in Google Scholar™

To enable FindIt!, the Library's OpenURL linking service, in Google Scholar™ on your personal computer:

1. Start at the Google Scholar™ homepage at <http://scholar.google.ca/>
2. Select  in the upper right-hand corner of your screen.
3. Select "Scholar preferences" from the drop-down list.
4. In the **Library Links** box enter either 'usask' or 'saskatchewan' then select the **Find Library** button.
5. The page should come back with "University of Saskatchewan Library" selected with a checkbox. At this point, make sure to **Save Preferences**.

In your Google Scholar™ search results, choose **Fulltext@UofSLibrary** to view the full-text of the article and **FindIt@UofSLibrary** to search for the book title in the UofS Library Catalogue.

NOTE: When accessing licensed library resources from off-campus, users will be prompted to authenticate with their NSID and password.

Enabling direct export to your RefWorks account

1. As above, on the Google Scholar page, select the  in the upper right-hand corner and choose scholar preferences from the drop down menu.
2. Scroll down to the **Bibliography Manager** section.
3. Select **Show Links** to Import into and select **RefWorks** from the drop-down menu.
4. Make sure to **Save Preferences**.

To initiate a direct export to RefWorks:

1. Conduct your search in Google Scholar
2. Each record displayed will have an **Import into RefWorks** link. Clicking on the link will launch the RefWorks login page.
3. Once you log in, you are brought automatically to the **Edit** view of the reference. If you do not wish to edit the record, you can navigate to any other area of RefWorks.
4. Your record is stored in your Last Imported folder.
