

UNIVERSITY OF
SASKATCHEWAN

University Library

engage, enlighten, explore
at your library

Enabling FindIt!/SFX in Google Scholar™

To enable FindIt!, the Library's OpenURL linking service, in Google Scholar™ on your personal computer:

1. Start at the Google Scholar™ homepage (<http://scholar.google.ca/>).
2. Select "Scholar Preferences".
3. In the "Library Links" box enter either usask or saskatchewan then click the "Find Library" button.
4. The page should come back with "University of Saskatchewan Library" selected with a checkbox. At this point, just click the "Save Preferences" button.

In your Google Scholar™ search results, choose "*Fulltext@UofSLibrary*" to view the full-text of the article and "*FindIt@UofSLibrary*" to search for the book title in the UofS Library Catalogue.

NOTE: When accessing licensed library resources from off-campus, users will be prompted to authenticate with either their NSID and password or last name and 12-digit library card number.

If you have questions about this or require assistance, please contact us at <https://library.usask.ca/uask>
