

# ***Open Access Webinar Microseries: OA and Copyright***

The University of Saskatchewan Libraries and the Saskatchewan Center for Patient-Oriented Research (SCPOR) invite you to two one-hour webinars, one on publishing research in Open Access journals or repositories, and one on copyright. Register today for these free webinars.

## **Getting Clear on Copyright**

Tuesday, October 23, 2018 at 12 PM CST

[Click here to register](#)

This webinar will include essential information about copyright for researchers. Topics covered will include author rights, literature review, copyright for text and measurement tools, presenting at conferences, using copyrighted materials (e.g., images) in your publications, and how to acquire copyright permissions.

Presenter: Kate Langrell received her Master of Information degree from the University of Toronto in April 2015, and has been the University of Saskatchewan Copyright Coordinator since May 2015. She joined the University Library in August 2017. In addition to copyright,

Kate is interested in the Open Access movement and scholarly communications librarianship. She is also a pianist, singer and guitar player.

## **Open Access Explained: What Researchers Need to Know**

Thursday, October 25, 2018 at 12 PM CST

This webinar will introduce authors to some practical methods for making their research open access (OA). The primary focus will be on the two main ways to make articles OA: publishing in an OA journal or self-archiving a manuscript in an open online repository. We will discuss the important issues to consider along the way and the most useful tools available to help. As readers you may encounter publisher paywalls - we will also talk briefly about (legal!) methods to access the articles you need.

Presenter: Diane (DeDe) Dawson is a Science and Scholarly Communication Librarian at the University Library, University of Saskatchewan. In addition to her MLIS degree, she holds a BSc in Biology and an MSc in Earth Sciences. Driven by her education and research background in the sciences, she has a strong interest in the ways scientists communicate the results of their research and how libraries can support this. DeDe's research focuses on scholarly communication and open access issues and she is a strong advocate for reformation in the scholarly publishing industry.
